

## DMR 3002 - M2AC DIMMERS SERIES

LUMIRON'S DMR 3002-M2AC Dimmers have a unique function of having an input of **12 / 24 VAC** and an output of **12 / 24 VDC** with a power of up to 240 Watts.

This is an excellent choice for any application especially those that have AC current as output and want to upgrade to LED Lighting that requires DC current output. This unique ability now allows your controller a move diverse capability of working with AC power of up to 240 Watts.

The DMR 3002 - M2AC is part of the LUMIRON line of new dimmers. This dimmer is created for ease of use with a ONE-TOUCH momentary switch that is designed to work with a single color series. This single switch will control three functions on - off and dimm with the ability to dim completely from 0-100%.

LUMIRON DMR 3002 - M2AC has a built-in memory that keeps the last function used in memory.

The DMR 3002's ability to truly dim allows you to create the level of illumination or ambiance desired

DMR 3002 is waterproof which makes it a great part of your indoor and outdoor design plans and an ideal choice for any marine application.

LUMIRON'S DMR 3002 - M2AC dimmer is easy to install, easy to use
